EraX (ERAX) Tokenomics FAQ

Key questions and answers about EraX Digital token economics.

Project: EraX Digital
Token: EraX (ERAX)
Token Status: Created – Pre-Launch
Last Updated: November 1, 2026

What is EraX (ERAX)?

EraX (ERAX) is the native ecosystem token of EraX Digital. It is designed to support ecosystem participation, staking incentives, community growth, governance, and platform-related economic activities.

The token is developed using Solidity smart contracts and the Hardhat development framework.

What is the total supply of ERAX?

The proposed maximum total supply is:

1,000,000,000 ERAX (1 billion tokens).

The supply is designed to be fixed, with no additional minting after the initial token issuance.

What is the token allocation for ERAX?

The proposed allocation distributes the total supply across six strategic categories:

Allocation	Percentage	Tokens
Community & Ecosystem	30%	300,000,000
Staking & Rewards	20%	200,000,000
Foundation & Treasury	15%	150,000,000
Team & Contributors	15%	150,000,000
Private Investors	10%	100,000,000
Partnerships & Marketing	10%	100,000,000
Total	**100%**	**1,000,000,000**

What is the vesting schedule for ERAX?

The proposed vesting schedule is designed to encourage long-term participation and responsible token distribution.

- Community & Ecosystem: 10% at TGE, remaining 90% over 36 months.

- Staking & Rewards: Distributed over 8 years according to the reward emission schedule.
- Foundation & Treasury: 10% at TGE, remaining 90% over 48 months.
- Team & Contributors: 12-month cliff, followed by 36-month linear vesting.
- Private Investors: 10% at TGE, 6-month cliff, followed by 36-month linear vesting.
- Partnerships & Marketing: 10% at TGE, remaining 90% over 36 months.

How many ERAX tokens will unlock at TGE?

The proposed initial unlock is:

82,000,000 ERAX (8.2% of total supply).

This includes:

- Community & Ecosystem: 30,000,000 ERAX.
- Foundation & Treasury: 15,000,000 ERAX.
- Team & Contributors: 0 ERAX.
- Private Investors: 10,000,000 ERAX.
- Partnerships & Marketing: 10,000,000 ERAX.
- Staking & Rewards: 17,000,000 ERAX.

What is the circulating supply of ERAX?

Before the Token Generation Event (TGE), ERAX has no publicly circulating supply.

- Maximum Supply: 1,000,000,000 ERAX.
- Pre-Launch Circulating Supply: 0 ERAX.
- Proposed Initial Circulating Supply at TGE: 82,000,000 ERAX.
- Remaining Supply: 918,000,000 ERAX.

What is the token emission schedule for ERAX?

The proposed emission schedule spans eight years.

Staking and rewards allocation: 200,000,000 ERAX.

Year	Annual Release
Year 1	25,000,000 ERAX
Year 2	25,000,000 ERAX
Year 3	25,000,000 ERAX
Year 4	25,000,000 ERAX
Year 5	25,000,000 ERAX
Year 6	25,000,000 ERAX
Year 7	25,000,000 ERAX
Year 8	25,000,000 ERAX
Total	**200,000,000 ERAX**

What percentage of ERAX is allocated to the community?

30% of the total supply, equivalent to 300,000,000 ERAX, is allocated to community and ecosystem development.

This allocation supports community participation, ecosystem incentives, adoption campaigns, and platform growth.

What is the utility of the ERAX token?

ERAX is designed to provide utility within the EraX Digital ecosystem through:

- Staking and reward participation.
- Community and ecosystem incentives.
- Governance and voting mechanisms.
- Platform-related economic activities.
- Strategic ecosystem partnerships.

What is the current development status of ERAX?

The ERAX smart contract has been developed and tested.

- Smart contract language: Solidity.
- Development framework: Hardhat.
- Deployment tooling: Hardhat Ignition.
- Automated tests: 21 passing.
- Mainnet deployment: Pending.
- TGE: Not yet conducted.
- Public trading: Not yet launched.
- Contract address: Not yet available.

What is the long-term vision for ERAX?

ERAX aims to become the core economic asset of the EraX Digital ecosystem, supporting sustainable ecosystem growth, community participation, staking incentives, and long-term platform development.

The token economic model is designed around a fixed supply, structured distribution, controlled vesting, and long-term reward emissions.
